Professional Summary

Highly skilled Java Developer proficient in crafting, enhancing, and sustaining a wide array of software solutions. Well-versed in project management and effective communication, with a visionary outlook on development. Possesses expertise in Java, SQL, HTML, CSS, JavaScript, and a spectrum of programming languages. Demonstrates unwavering dedication, meticulous attention to detail, and a track record of delivering exceptional outcomes while strictly adhering to established protocols.

Throughout my career, I've successfully delivered secure and feature-rich applications, including a robust banking application and an e-commerce platform. My focus extends to project management, ensuring usability and seamless interface design.

My commitment to continuous improvement, along with my strong critical thinking and conceptual design abilities, consistently yield exceptional results. I've contributed to a range of projects at United Bank Of Africa (UBA) Africa Prudential Plc, Upwork, and Frond Ltd.

Projects

Banking Application:

- Crafted a robust and secure banking application offering a wealth of features empowering customers to seamlessly oversee account activities, facilitate fund transfers, and access transaction records.

E-Commerce System:

- Expertly architected and implemented an advanced E-Commerce System, leveraging cutting-edge technologies to facilitate seamless online transactions, and drive revenue growth. Technologies: Java, Spring boot, MySQL.

Vehicle Fleet Management System:

- Proficiently designed, developed, and implemented a comprehensive Vehicle Fleet Management System.

Waste Management and Recycling System:

- Skillfully designed and deployed an innovative Waste Management and Recycling System, integrating technology to efficiently track, process, and manage waste materials.

Registration Portal:

- Developed an intuitive and versatile Registration Portal facilitating seamless user onboarding and interaction. Designed with user-centric features to streamline registration processes.

Work History

Software Developer (ESB Developer) **United Bank Of Africa (UBA) – Lagos, Nigeria**

01/2024 to Current

- Designing, developing, testing, and maintaining software applications tailored to the bank's needs.
- Design, develop, and maintain ESB components, including message flows, transformations, and routing rules, using industry-standard ESB platforms such as ACE (App Connect Enterprise) Toolkit or IBM Integration Bus (IIB).
- Collaborate with business analysts, solution architects, and other stakeholders to understand integration requirements and design scalable and robust integration solutions.
- Implement service orchestration patterns to coordinate and automate business processes across multiple systems and services. Develop reusable integration components and service endpoints to facilitate rapid development and deployment of integration solutions.
- Integrate backend services with third-party APIs, systems, and services as needed. This includes payment gateways, authentication providers, messaging services, and more.
- Conceptualized and engineered innovative systems aligning with user requirements, fostering heightened productivity.

Java Developer **Africa Prudential Plc – Lagos, Nigeria**

03/2023 to 12/2023

- Design and implement RESTful APIs and web services to enable communication between the backend systems and frontend clients. Ensure that APIs are well-documented, secure, and scalable to accommodate future growth.
- Design, develop, and maintain Java-based server-side applications and services to support the company's products and services. This includes implementing new features, enhancing existing functionality, and optimizing performance.
- Conducting testing of troubleshooting techniques and documented solutions for incorporation into the knowledge base utilized by the support team.
- Participated in IT meetings, engaging with other developers to brainstorm design and coding concepts.
- Integrate backend services with third-party APIs, systems, and services as needed. This includes payment gateways, authentication providers, messaging services, and more.
- Conceptualized and engineered innovative systems aligning with user requirements, fostering heightened productivity.
- Deployed data storage solutions encompassing SQL and NoSQL databases.
- Executed additional responsibilities as directed by management.

Software Developer – Frontend **Roger Solutions – Florida, USA**

08/2022 to 02/2023

- Collaborated with design teams and other Software Engineers to develop tailored software solutions for end-users.
- Explored novel software applications, choosing and integrating administrative information systems.
- Swiftly prototyped advanced data processing functionalities, validating seamless integration within established systems.

- Engaged closely with colleagues to pinpoint challenges and offer effective resolutions.

IT Support

02/2019 to 07/2022

National Human Rights Commission – Ogun, Nigeria

- Provide technical support to all staff members on hardware, software, and network-related issues.
- Collection, storage, and analysis of data related to human rights issues. This includes maintaining databases of human rights violations, analyzing trends and patterns in the data.
- Install, configure, and maintain computer systems, peripherals, and software applications.
- Assist in the development and implementation of IT policies and procedures.
- Train staff members on the proper use of IT equipment and software applications.
- Collaborate with external vendors and service providers as needed for IT-related projects and support.
- Member, Monitoring of 2019 Presidential and Gubernatorial elections.
- Member, Inspection and Evaluation of Prisons in Ogun State.

Education

Master of Business Administration: Marketing 2022
Ahmadu Bello University, Zaria - Kaduna State, Nigeria

Master of Science: Sociology 2021
University Of Lagos - Lagos State, Nigeria

Bachelor of Science: Sociology 2016
University Of Ibadan - Oyo State, Nigeria
